👤 Profile

I am a Full-stack Developer with almost 4 years of professional experience specializing in modern web technologies such as Node.js, TypeScript, and React. I have worked on diverse projects requiring both front-end and back-end development, gaining a solid understanding of the full development lifecycle, including partial experience with cloud and DevOps technologies.

I hold a Master's degree in computer engineering (2022) and have international experience from studying at Charles University, as well as participating in the WAT program in the USA, ERASMUS+ in Portugal, and organizing an international hackathon in Slovakia. Additionally, I created 2 courses for the educational platform Skillmea on MongoDB and Node.js. I am goal-seeking and ready to work hard and improve my skills every day.

🎓 Education

Computer Science | Ing.
Technical University of Kosice

2020 – 2022   KOSICE, SLOVAKIA

Diploma thesis "Program Comprehension and Quality Experiments in Programming Education". The work resulted in an article that was accepted at the ICPEC 2022 conference and published in the ICPEC'2022 Proceedings.

Informatics Engineering
Universidade do Minho
